

Original Collection

The 1" Nature Tiles

Choose from among 16 designs each in 8 colors and two thicknesses. The tile is about 5/16" thick and the corners are at least 3/4" thick. The corners have glazed edges to better create interesting borders with other trim tile.

We use the corners as border trim, mural trim and corners. Placed between dome liners the incredible detail of these porcelain mosaics makes a simple and beautiful room border. The tiles can also be used as floor inserts in a staggered design with larger tile.

We substituted a background color in this line (Bark Brown replaces Gray). The Bark Brown works well and suits many of these designs. Additionally, the color works particularly well because the corners are often used with the Rainforest Series and the Branch Liners.
