The 1" Nature Tiles

Choose from among 16 designs each in 3 colors and two thicknesses. The tile is about 5/16" thick and the corners are at least 3/4" thick. The corners have glazed edges to better create interesting borders with other trim tile.

We use the corners as border trim, mural trim and corners. Placed between dome liners the incredible detail of these porcelain mosaics makes a simple and beautiful room border. The tiles can also be used as floor inserts in a staggered design with larger tile.

The Trims

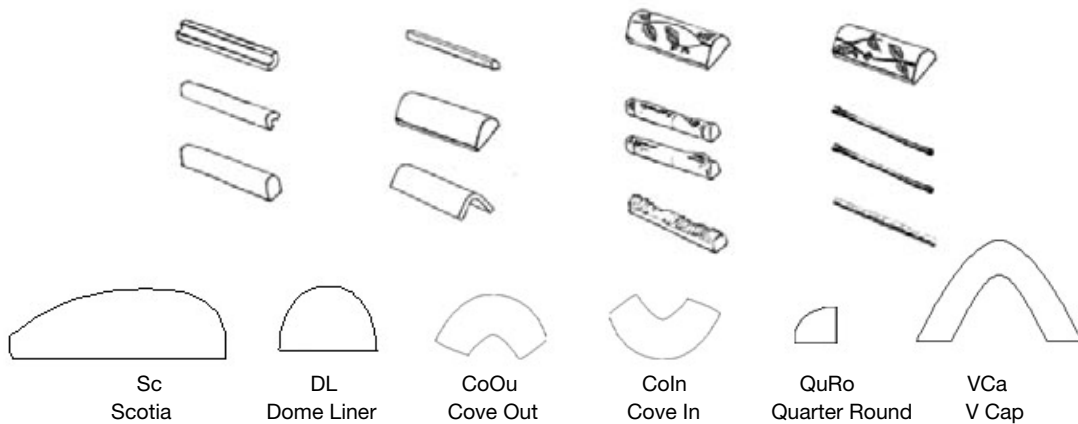

Surviving Studios' Trims include traditional and specialty trims to frame and border your designs. All are made in nominal 6" lengths with varying widths and heights.

The Branch and Birch Liners and their matching Twigs look real and make a beautiful and unique trim. The Branches and Twig Liners have several design variations and each order comes with a mixture to give a very natural effect. Trim a room with only the branches and the simplicity is lovely, or insert little 1" leaves or animals to add interest and a more decorative look.

Other unique trims are the Surf Liners and Pencils. These trims are especially effective if the tile setter is sensitive to design and creates more variety by flipping the pieces.

Our new 2 x 6 connectors help make 2" borders possible. Add insects and frogs to the connecting vines or fish and shells to the rolling waves.
