

Watercolor Series

The 6" Water World Tiles

Originally designed for swimming pool borders, the Water World Collection is even more popular in bathrooms, murals, hot tubs, fountains, and kitchens. The line consists of six designs with an ocean theme, six with a pond theme and the four-tile Alligator mural. The Alligator is very popular and makes a great focal point.

The Water World Watercolor tile all connect through a textured wave background. The unifying element is the Water Pattern which can be flipped to give variety when many are used together. We've added a 6" Swirl to this line to allow for bordering and finished corners. All the tiles can be used for underwater murals as well as borders.

The specialty set of a 2 piece Lily pad Curve Set can be used to make borders, frames, and add interesting vignettes to a mural. One of my favorites is to face two triptychs towards each other, leaving a circle in the center. Then insert an applique (cutout) of any of the other lily pad designs.
